

Leading Fuel Cell Technologies

Applications, costs, economic competitiveness and future prospects

By Paul Breeze

Paul Breeze

Dr Paul Breeze has specialized in the electricity sector for the past 25 years. He is contributing editor for the monthly international magazine for the power industry, *Modern Power Systems*, and as freelance writer he has contributed to *The Financial Times*, *The Guardian*, *The Daily Telegraph*, *The Observer* and *The Economist*. In addition to the power sector, Paul Breeze's interests include science and the computer industry.

Table of Contents

Leading Fuel Cell Technologies

Executive summary	10
Introduction	10
Fuel cell basics	10
Phosphoric acid fuel cells	11
Proton exchange membrane fuel cells	11
Molten carbonate fuel cells	12
Solid oxide fuel cells	13
Alkaline fuel cells	13
The direct methanol fuel cell	14
The cost of fuel cells	14
The future of fuel cells	15
Chapter 1 Introduction	18
Introduction	18
The history of fuel cells	19
The structure of this report	20
Chapter 2 Fuel cell technology	24
Introduction	24
How a fuel cell works	25
Catalysts	27
Efficiency	28
Types of fuel cell	30
The alkaline fuel cell	31
The phosphoric acid fuel cell	32

The proton exchange membrane fuel cell	33	
The molten carbonate fuel cell	34	
The solid oxide fuel cell	35	
The direct methanol fuel cell	36	
Fuel and fuel processing	37	
The hydrogen economy	38	
Distributed generation	39	
Environmental benefits	40	
Chapter 3	Phosphoric acid fuel cells	44
Introduction	44	
PAFC cell technology	45	
Fuel processing	49	
Commercial PAFC units	50	
Applications for PAFC fuel cells	54	
Costs of PAFC fuel cells	55	
PAFC prospects	55	
Chapter 4	Proton exchange membrane fuel cells	58
Introduction	58	
PEM cell technology	59	
Fuel processing	65	
Commercial PEM fuel cells	67	
Applications	70	
Cost of PEM fuel cells	71	
Future prospects	72	
Chapter 5	Molten carbonate fuel cells	74
Introduction	74	
MCFC technology	76	

Fuel processing	80	
Commercial molten carbonate fuel cells	81	
Applications	84	
Cost of MCFC fuel cells	85	
Future prospects	87	
Chapter 6	Solid oxide acid fuel cells	90
Introduction	90	
SOFC technology	91	
Fuel processing	95	
Fuel cell-turbine hybrids	96	
Commercial SOFC developments	97	
Applications	101	
The cost of SOFC fuel cells	102	
Future prospects	103	
Chapter 7	Alkaline fuel cells	106
Introduction	106	
Alkaline fuel cell technology	107	
Fuel processing	110	
Commercial AFC units	111	
Applications	112	
Costs	113	
Future prospects	113	
Chapter 8	The direct methanol fuel cell	116
Introduction	116	
DMFC technology	117	
Commercial DMFC fuel cells	121	
Applications	121	
Costs	122	

Future prospects	123	
Chapter 9	The cost of fuel cells	126
Introduction	126	
Costs for stationary applications	126	
Cost comparisons and other data	130	
Fuel cell cost targets	135	
Chapter 10	The future of fuel cells	138
Introduction	138	
Stationary fuel cell market	140	
Other fuel cell markets	146	
Fuel cell prospects	148	

List of Figures

Figure 5.1:	MCFC fuel cell costs and cost reductions (\$/kW), 1996-2006	86
Figure 9.2:	The cost of fuel cells for stationary applications (\$/kW)	128
Figure 9.3:	Cost comparison with other generation technologies, (\$/kW)	132
Figure 9.4:	Comparison of generation costs for different technologies (\$/MWh)	134
Figure 10.5:	Annual large stationary fuel cell installations (over 10kW)	141
Figure 10.6:	Forecast large stationary fuel cell sales (number of units, cumulative capacity in MW), 2008-2009	142
Figure 10.7:	Annual small stationary fuel cell shipments (under 10kW), (Number of units shipped), 2001-2007	144

List of Tables

Table 2.1:	Fuel cell characteristics	30
Table 2.2:	Typical Fuel Cell Power Plant Emissions (ppm)	40
Table 3.3:	Phosphoric Acid Fuel Cell Characteristics	47
Table 3.4:	Operating parameters for PC25C fuel cell	51
Table 3.5:	PC25C emissions	52
Table 4.6:	Proton exchange membrane fuel cell characteristics	63
Table 4.7:	Ballard Power Systems 250kW fuel cell prototype specification	67
Table 4.8:	Plug Power residential fuel cell specification	69
Table 5.9:	Molten carbonate fuel cell characteristics	78
Table 5.10:	FuelCell Energy prototype MCFC stack	82
Table 5.11:	MCFC fuel cell costs and cost reductions (\$/kW), 1996-2006	85
Table 6.12:	Solid oxide fuel cell characteristics	93
Table 6.13:	Westervoort 100kW pilot plant	98
Table 7.14:	Alkaline fuel cell characteristics	109
Table 8.15:	Direct methanol fuel cell characteristics	119
Table 9.16:	The cost of fuel cells for stationary applications (\$/kW)	127
Table 9.17:	California Energy Commission generation cost estimates for fuel cells (\$/kW, \$/MWh)	130
Table 9.18:	Cost comparison with other generation technologies, (\$/kW)	131
Table 9.19:	Comparison of generation costs for different technologies (\$/MWh)	133
Table 10.20:	Annual large stationary fuel cell installations (over 10kW)	140
Table 10.21:	Forecast large stationary fuel cell sales (number of units, cumulative capacity in MW), 2008-2009	142
Table 10.22:	Annual small stationary fuel cell shipments (under 10kW), (Number of units shipped), 2001-2007	144
